GUARDPOINT 10

Why choose GuardPoint 10

High Security

- Bringing together the video, access and alarm events seamlessly allows the operator to deal with incidents swiftly and intelligently.
- Manage your building effectively and visually via a real time audit trail.
- Intelligently automate building response to threats without operator interference.

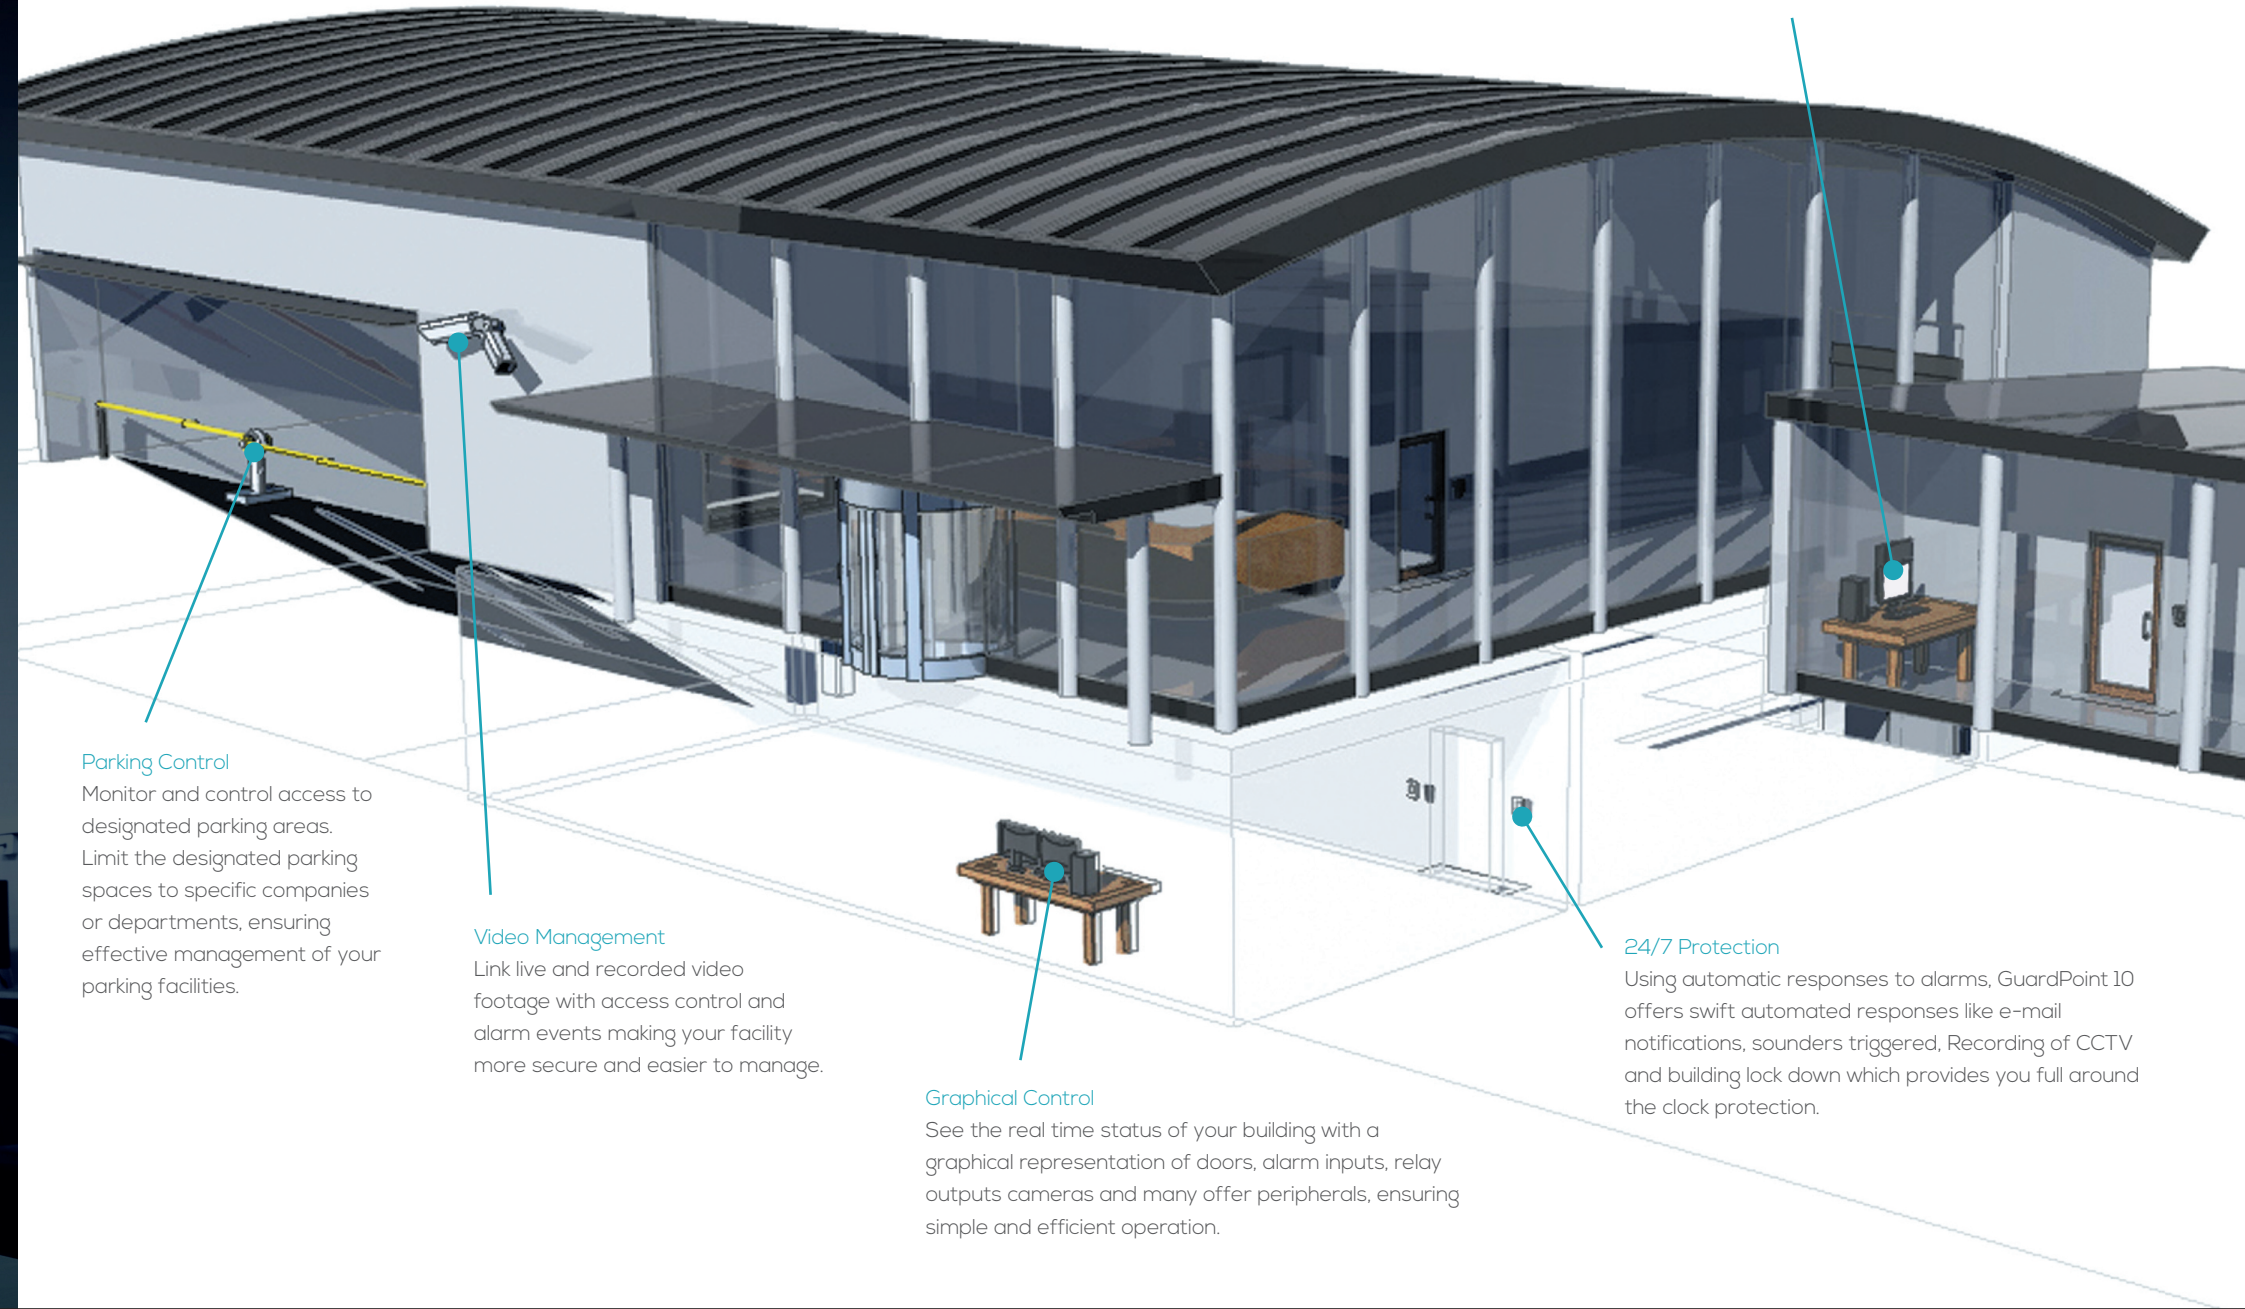

Simplicity

- The interface has been divided into three categories: Setup, Management and Security, this provides a simplified administration and quick user training.
- Smart search facilities on all windows allowing the operator to quickly and simply find the information they are searching for.
- Real time animated indicators provide the operator quick recognition of any changes to the state of any controlled device.
- Batch operations allow the operator to carry out changes to groups of users in one simple step.

Providing the complete solution:

Designed to streamline and automate the safe guarding of your building.

Parking Control

Monitor and control access to designated parking areas. Limit the designated parking spaces to specific companies or departments, ensuring effective management of your parking facilities.

Video Management

Link live and recorded video footage with access control and alarm events making your facility more secure and easier to manage.

Graphical Control

See the real time status of your building with a graphical representation of doors, alarm inputs, relay outputs cameras and many other peripherals, ensuring simple and efficient operation.

Multi-Site

Landlords and the head office of a company can be provided one common access control system, but yet offer the tenant or remote location independent control of their own facility. This feature ensures efficient and simple expansion for your security system.

24/7 Protection

Using automatic responses to alarms, GuardPoint 10 offers swift automated responses like e-mail notifications, sounders triggered, Recording of CCTV and building lock down which provides you full around the clock protection.
